

## PCO CloudView Internet Access to any TMS4000/4000M/4000W/3000E Tank Management System via Ethernet or Cellular Connectivity

### Product Description

PCO Cloudview is a web-based application supporting remote connectivity for any TMS4000/4000M/4000W/3000E Tank Management System via included Ethernet port or optional, internal cellular modem. The application provides secure, unlimited, full access, including real-time data, alarm notifications via SMS/e-mail alerts, log reports, configuration read and write, as well as firmware updates, all via any PC, tablet or cell phone. The cellular modem option uses the IoT narrow-band spectrum, so annual service costs are generally less than \$50/year<sup>1</sup>, with unlimited data. PCO Cloudview customers can assign their own administrator who can then admit any number of users, with varying degrees of access to both sites and services.

### Features

- Full, secure connectivity to any TMS4000/4000M/4000W/3000E from anywhere, with any smart device.
- All systems are provisioned as Internet-ready via included Ethernet port, or via optional cellular modem.
- Access real-time data, alarms and log reports, view or change system configuration, get firmware updates for new features.
- Unlimited SMS/eMail alerts.
- Encrypted MQTT protocol used for all messaging, with improved data transport efficiency over HTTPS, important when operating over cellular services that have data usage limits.
- Device List and Map views supported.
- Export/Print functions provided for all log reports.
- REST API service available for customers using third-party access providers.
