EXPANDED MONITORING CAPACITY
at a Lower Cost

THE TMS3000 ADVANTAGE

The TMS3000 automatic tank gauge provides powerful remote environmental compliance and inventory management capabilities for up to 12 tanks. The console can be installed indoors or outdoors without the need for a secondary enclosure or additional heating/cooling systems. This capability lowers installation expenses and enables the console to deliver long-lasting performance.

## User-Friendly Console Is Easy to Operate and Update

- ✓ Remote accessibility provides real-time visibility of tank levels and alarms

- ✓ LED lights signal alarms for leaks, 3 product setpoints and water

- ✓ Inventory data, polling, reporting, programming and alarm notifications available through TMSComm software

- ✓ Email alerts available through TMSComm

- ✓ Configuration and programming updates can be prepared off-line and off-site, enabling quicker on-site service calls

Modular, Versatile and Low-Cost

- ✓ Monitors up to 12 tanks

- ✓ Supports AST and UST applications

- ✓ Supports bulk storage, jobber/distributor, retail, fleet, back-up generator and oil/water separator applications

- ✓ "Black box" version of console available to meet ultra-low-cost applications

HIGHLIGHTS OF THE
TMS3000 TANK MANAGEMENT SYSTEM

Expanded Inventory Monitoring Capacity

- Supports up to 12 mag probes.
- Supports tank heights from 6" (200mm) to 70' (21M).
- Supports up to 40 Leak Sensors.

High Performance and Reliability Standards

- Continuous leak detection expedites environmental compliance.
- Large LED display is very bright — even in daylight.
- Lockable dust-proof enclosure is standard, weather-proof, corrosion-proof and explosion-proof options are available.

Engineered to Reduce Installation Costs and On-Site Service

- Plug-In Relay I/O Cards provide seamless communication with other equipment, decreasing the need for additional components.
- Built-in industrial communication and Modbus protocols reduce the need to install secondary equipment.

- Programming and configuration updates can be prepared offline using TMSComm ahead of service appointments, which can help shorten technician visits.

User-Friendly Reporting

- TMSComm enables operators to access real-time inventory, alarms and statuses in easy-to-read tabular and/or bar graph formats.
- Reports include Inventory, Delivery, Bulk Sales, Thefts, Product Ordering, Water Removal, Alarms, Events, In-Tank Leak Test Results and Leak Test History.
- Inventory data is formatted to work with Statistical Inventory Reconciliation (SIR) platforms.
- Optional internal printer available.
- Print reports automatically or on-demand.

Accreditations and Certifications

- Third-party approved for In-Tank Leak Detection and Optional Line Leak Detection.
- UL/cUL approved.
